EDUCATION

CARNEGIE MELLON UNIVERSITY – TEPPER SCHOOL OF BUSINESS	Pittsburgh, PA
<i>M.S. in Business Analytics</i>	Aug 2026 – May 2027 (Expected)
NATIONAL YANG MING CHIAO TUNG UNIVERSITY (NYCU)	Taipei, Taiwan
<i>M.S. in Biophotonics</i>	Sep 2024 – Jun 2026
Honors: Outstanding Thesis Award	
NATIONAL YANG MING CHIAO TUNG UNIVERSITY	Taipei, Taiwan
<i>B.S. in Biomedical Imaging and Radiological Sciences, Minor in Biomedical Engineering</i>	Sep 2020 – Jun 2024
Honors: Honor Student Award; Leadership: President, Department Student Association	

EXPERIENCE

AITEWAN BIOMEDICAL TECHNOLOGY CO., LTD.	Taipei, Taiwan
Product Manager Medical AI Startup (Part-time)	Jul 2024 - Jun 2026
- Led weekly user discovery and workflow testing with 5 physicians across 2 medical centers, iterating on product requirements and launching an in-product progress indicator that gave users visibility into AI processing. - Reduced end-to-end AI processing time by ~67% (from ~2 minutes to ~40 seconds) by partnering with users and engineers to test trade-offs across latency, sensitivity, and false-positive burden while maintaining clinically acceptable model performance. - Defined and launched institution-level model thresholds using competitor benchmarks and user workflow needs, prioritizing sensitivity for screening centers and more balanced performance for medical centers. - Drove weekly product development and delivery across 12 cross-functional stakeholders spanning AI/ML, software/UI, regulatory and clinical operations, and leadership; coordinated dependencies, testing, and release risks, recommending deferral of a late model upgrade after identifying 3-6 months of revalidation risk to protect the June release timeline.	
AI IN MEDICAL IMAGING / SIGNAL ANALYSIS LAB, NYCU	Taipei, Taiwan
Research Assistant	Feb 2023 – Jun 2026
- Led development and multicenter evaluation of a brain-tumor AI system across 12,437 scans, reducing false positives per scan by 73.2% while maintaining 90.13% lesion sensitivity; presented related first-author work at MIDL 2026 (poster) and AMLDS 2026 (oral; Outstanding Oral Presentation Award). - Developed and optimized a 3D U-Net pipeline for automated thoracic aorta segmentation across 308 CT studies in an 8-month government-funded project, achieving 0.95 AUC.	
DEPARTMENT OF RADIOLOGY, NATIONAL TAIWAN UNIVERSITY HOSPITAL	Taipei, Taiwan
Clinical Intern	Jul 2023 – Jan 2024
Earned a Certificate of Excellence after completing clinical rotations across diagnostic imaging, radiation therapy, and nuclear medicine.	
BIOMEDICAL IMAGING PHYSICS & INSTRUMENTATION LAB, NYCU	Taipei, Taiwan
Test Manager / Research Assistant	Jun 2021 – Feb 2023
- Managed end-to-end technical testing for 8 products across 5 external clients, scoping requirements, communicating nonconformities and retesting needs, and delivering 10+ formal reports supporting regulatory reviews. - Built a MATLAB pipeline for automated CT bone segmentation and quantitative bone-density analysis, adopted by 2 university laboratories.	

SKILLS

- Product:** User Research, User Requirements, Product Development & Delivery, Feature Prioritization, Product Testing, Release Planning, Competitive Analysis, Cross-functional Collaboration.
- Technical & Data:** AI/ML, Model Evaluation, Data Analysis, Python, SQL, PyTorch, TensorFlow/Keras, scikit-learn, MATLAB.
- Technical Presentations:** MIDL 2026 first-author short paper (poster); AMLDS 2026 first-author oral presentation (Outstanding Oral Presentation Award).
- Tools:** Notion, Excel, Google Sheets, PowerPoint.
- Credential:** Licensed Medical Radiation Technologist, Taiwan Ministry of Health and Welfare (2024).
